

How do I Get Started?

1. Email a list to InsideTeam@infraresolutions.com of your excess inventory for market valuation. An INFRA Resolutions representative will respond within 24 hours to let you know if your equipment has market value and provide an estimate.
2. There are different shipping and on-site assessment options, although INFRA pays shipping on all equipment purchased. INFRA's Professional Assessment Team will perform a complete inspection and system testing to determine actual condition and confirm market value.
3. With the inspection completed, INFRA's Professional Assessment Team will provide an Inventory Assessment Report detailing the condition and value of your equipment.
4. You can log into our custom portal to track your assets during the whole process. Finally, you can choose to sell your equipment to INFRA, and you are paid promptly in cash or with a trade credit that can be used immediately to purchase other equipment or applied to your INFRA account for future use.
